

## Suixtil introduces the Silverstone jacket

The year is 1954, and the season wetter than anyone cares to remember, making the challenge of racing even greater than usual! The roads and tracks, usually treacherous, are now simply lethal. And what with the added complexities of poor visibility, mechanical complications and just the gnawing concern of coming first, always, ever, among a crew of incredibly brave competitors all striving for the same goal, the same checkered flag.

And who are these men, huddled around El Chueco, all

looking like the weather has no bearing on them. Who is this giant towering next to his Ferrari, snugly ensconced in his **Suixtil** racing jacket looking so sure of himself at Reims? How can the pampa's bull already know this will be such a great year for him (his best in fact), maybe he is just fondly recollecting the triumph of a fortnight before when Petoulet and him triumphed at Le Mans? Or he

is contemplating the coming British GP where he will tear the first place at Silverstone from all the other greats, beating such legends as Mike Hawthorn and even Fangio himself who was holding the pole position? Or is he maybe just comfortably waiting for the race to kick-off, comfortable in **Suixtil** despite the inclement weather, living the moment –at life speed!

Whatever the case may be, we thought it was the right time to bring back the iconic jacket that adorned the Escuderia Argentina, and José Froilán

González, to their greatest victories. So here it is now for you to enjoy, the **Suixtil Silverstone!**

Classic in construction, in light brown cotton/nylon, water repellent and Teflon coated to ensure rain and dirt protection, with genuine suede trimmings, 2-way YKK Excella zipper and a unique **Suixtil** puller, comfort pockets, real horn buttons and original vintage-looking lining, the Silverstone is certainly designed to offer both great driving comfort and every day style.

You can race now to the [online store](#) to order your own or look for a retailer near you and enjoy the Silverstone through the coming season at life speed!
